Transforming School Climate Mindsets and Ecosystems

Educator Panel: Creating Healing, Restorative Learning Ecosystems

February 29, 2024

California Center for School Climate

Relevant	Data Use	Connection	Partners
Deliver relevant, responsive, and engaging technical assistance on a variety of school climate topics that meet LEAs and schools where they are.	Support LEAs and schools with best practices for collecting, using, and measuring data to support equitable school climate systems change and positive school climates.	Serve as a connector across the state to promote and disseminate best practices.	Support LEAs and schools in building connections with education partners in creating a supportive school climate for all.

Healing, Restorative Classrooms, Schools, and Systems

What would make a learning space feel "healing"? What would it sound, look, feel, taste, and even smell like? Use images and words to describe and share your collective vision.

The collage features several images and text boxes:

- Support by making students aware that they have support judgment-free and resources as if there is a light at the end of the tunnel. Showing empathy and adjusting to needs.** (Yellow box with a star icon)
- HEALING** (Yellow box)
- +1** (Pink box)
- +1** (Yellow box)
- +1** (Yellow box)
- +1** (Yellow box)
- House plants are very healthy !** (Yellow box with a star icon)
- Removing factors that create a not very healing environment including the pressures, focus on high achievement, gossip/social media,** (Yellow box with a star icon)
- +1** (Yellow box)
- NOT HEALING** (Yellow box)
- +1** (Yellow box)

Images include: a teacher and student high-fiving, two people talking, a boy reading a book, a group of people, house plants, and social media icons.
